SECURE DATA FROM WILMINGTON

RECORD CENTER AND 910GEEKS.COM

Your data is crucial to your success as a business, our cloud backup solutions ensures data is backed up, automatically and over a secure, encrypted connection to a secure off-site location.

Service Overview

910Geeks Cloud Backup is a service that allows you to select and backup specific files and folders from your Cloud Server. You can schedule any number of Backup jobs, and restore to the same system or a different one, giving you the flexibility and power to work with your schedule and your data.

910Geeks customers now have two options for backing up to the Cloud Server. Below is a brief summary of both:

- **910Geeks Cloud Backup** - 910Geeks Cloud Backup is a fully integrated, file-based backup solution that helps protect your data on cloud servers
- **910Geeks Cloud Server Image Backup** - Cloud Server Image Backup is a copy of the entire state of a Cloud Server stored either on Cloud Files or on the Cloud Server's host, depending on the environment. Images can be scheduled or created on-demand.

Some key features

- Select the files and folders to the Cloud Backup Server you want to back up
- Run your backups manually or on a schedule that works for you
- See the activity from all your backups, both current and previous
- Use AES-256 encryption with a private encryption key known only to you
- Restore individual files and folders from a particular date
- Save space with incremental backups that only save the changed portions of files
- Create unlimited Backups

Did you know that 43% of the companies without a recovery plan that experience a severe data-loss, never re-open. (Symantec)

Relax……..We're on it!

Ease of Use

Reliability and cost are important, but ease-of-use can also be a deciding factor when choosing a backup solution. With cloud backup, setting up the solution involves the simple process of signing up online and installing a small client on the computer or server. Within minutes, you can begin backing up files.

67% of the companies that do backup haven't verified what they are backing up and if they will restore properly. *(Infoworld)

We test the backup process, verify the restore process and give you a monthly report!
